DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15,27,28, drawn to a process and apparatus for using a wear resistant band in a gyratory crusher, classified in class 241, subclass 30.
- II. Claims 16-26, drawn to a process and apparatus for providing a particular type of concave in a gyratory crusher, classified in class 241, subclass 207.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I as well as invention II has separate utility such as crushing material without the particulars of the other invention. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Ziebert on 11/19/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3725

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
